

## **Mohan Kulal aims to improve his agriculture production through Vermicompost unit**

Mohan Kulal is a small farmer. He hails from Rayee village, Bantwal taluk, D.K district, Karnataka, India. He has few coconut plants and grows paddy. He is a skilled worker. He is expert in making concrete rings. He has already made several hundred concrete rings for drinking water wells. He also undertakes well construction with protective wall construction for drinking water wells and irrigation wells. This summer 2020, he and his team constructed protective walls for more than 20 wells.

During monsoon he engages himself in agriculture. This summer he has built a vermicompost unit. What special about his vermicompost unit is it's a circular construction. He plans to produce manure out of agriculture residues and cow dung.

He is helped partly by DISHA Trust through AHB supported NRM Project. He is thankful to his benefactors. He is hopeful to increase agriculture production through vermicompost unit.
